

REMARKS

This Preliminary Amendment seeks to place this application in condition for allowance. Pending claims 1-8 have been deleted, without prejudice, and new claims 9-34 are added to more fully and adequately protect the instant invention(s). These newly submitted claims are fully supported by the specification as originally filed. No new matter has been added.

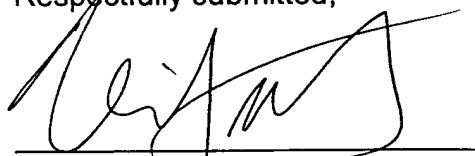

It should be noted that an English translation of an Amendment presenting amended claims 1-6 was inadvertently included with the Application, as filed in the USPTO, on April 2, 2002. This Amendment, however, was neither filed with the WIPO nor entered into the PCT application. As such, claims 1-8 of the November 26, 2001, not claims 1-6, were pending when this application was filed with the USPTO. The undersigned apologizes for any confusion this may have caused.

CONCLUSION

Applicant respectfully requests entry of the foregoing Preliminary Amendment prior to examination of this application. Applicant submits that all of the claims present patentable subject matter which definitely set forth the novel and unobvious features of Applicant's invention(s). Accordingly, Applicant respectfully requests allowance of all of the claims.

Date: August 15, 2002

Respectfully submitted,

Neil A. Steinberg
